BAG SIZE:

25KG

YIELD:

1m²

24-25 WHEN
LAID ON SIDE

MEASURES APPROX:

530x80mm

PER BAG

Dricon Culvert Bags are an easy, cost-effective retaining wall solution that is ideal for all types of culvert, stabilisation and erosion control applications. Dricon Culvert Bags are the stop-gap to your concrete and masonry needs. Like bricks, lay the bags to create retaining and wing walls. Once in place, secure the bags by spearing them through with y posts, basalt or steel rods. Then hose them down with water and leave to the elements to harden. The biodegradable bag gently breaks down to reveal the set concrete within, providing a natural finished look. Ideal for general stabilisation and re-instatement work. Suitable for residential, civil, commercial and rural projects.

BENEFITS

- > Minimises waste
- > Easy to use and transport
- > Perfect for erosional control and stabilisation
- > Affordable, cost-effective solution
- > Environmentally friendly – Made with EcoSure Low Carbon Cement and biodegradable paper bag

USES

- > Culverts
- > Retaining Walls
- > Wing Walls
- > Erosion Control
- > Bridge Abutments
- > Gabions
- > Track Stabilisation
- > Farm Support
