

Designer Concrete is produced in a wide range of looks to suit any kind of house style. With Designer Concrete's myriad of colours, textures and finishes, the choice is all yours.

DESIGNER CONCRETE - CANTERBURY

Canterbury Concrete's Designer Concrete utilises an extensive range of materials sourced from throughout the South Island. Choose from our standard range or work with our experienced staff to design a unique look and feel suitable for your home.

EXPOSED CONCRETE

Waimak

Southern Alps

Otautahi

Rakaia

Castle Rock

Port Hills

COLOURED CONCRETE

Otakaro

Hagley

Akaroa

Oxford

Lyttelton

Sumner

While every care has been taken to obtain an accurate representation, the colours and textures shown above are subject to the limitations of the printing process and may not be a true representation. The aggregates and oxides used are natural products and hence some variations will occur. Samples are to be used as an indication of colour and texture, not a comparison. Handling, placing, temperature and the actual situation can and will have an effect on the finished look. We recommend inspection of an actual installation prior to purchase. Please keep in mind when you are choosing Designer Concrete that you are dealing with a natural material that can be influenced by a number of factors.

CONCRETE IS SO VERSATILE

Here's a great example of what happens when the natural and enduring good looks of a Canterbury Concrete Designer Concrete solution meets the superb good taste of a quality home design.

The recognition of concrete's versatility for paths and drives includes a growing appreciation of the value of colour. Such inspired designs and choice of colour mean the old, plain grey slabs of concrete are a thing of the past.

BRING THE OUTDOORS, IN

If indoor-outdoor flow is what you are looking for, exposed aggregate polished concrete is the answer. Reflecting the trend for slick, easy care, contemporary surfaces, polished concrete can be used both inside and out. Exactly the same flooring treatment in both areas creates a seamless flow so that it becomes one big, open, but versatile space.

Under floor heating inside keeps the living space toasty and the thermal mass properties of concrete, keeps it cool in summer.

Concrete's durability gives further advantages over alternative flooring so it will continue to look good long after other surfaces become weathered and worn.

COLOURED CONCRETE

Concrete can be given colour through the addition of oxides to the concrete mix. There are a wide range of coloured oxides to choose from so the choice is yours.

TIMBER AND CONCRETE, GREAT TOGETHER

To create a variety of textures and finishes that are easy on the eye, treated timber or hardwood always looks superb with coloured concrete or exposed aggregate.

Exposed aggregate provides an attractive texture and a range of natural hues, along with all the strength, durability and low maintenance quality that only Canterbury Concrete can provide.

SUSTAINABILITY: CANTERBURY CONCRETE'S SUSTAINABILITY LIFECYCLE

- ☑ Environmentally compliant manufacturing plants
- ☑ Surplus water and some aggregates recycled
- ☑ Low transport impacts
- ☑ Leftover concrete returned from construction sites
- ☑ Passive solar heated thermal mass makes completed buildings more energy-efficient
- ☑ Most wash water returned from construction sites
- ☑ Highly durable, low maintenance buildings and no rot
- ☑ High degree of noise control
- ☑ Inherent fire resistance
- ☑ Overall longer effective building life
- ☑ Demolished concrete can be recycled as hard fill or aggregate
