NO MORE PUDDLES ON YOUR PATIO

NEW FROM FIRTH’S ECOPAVE RANGE, A PERMEABLE PAVER, THAT IS PERFECT FOR RESIDENTIAL PATIOS!

A stylish 300x300mm size, with the added benefit of assisting with managing storm water runoff, allowing water to filter through to the underlying drainage system.

The paver has enlarged nibs on all four sides which creates wider than usual gaps around each paver, this space allows water to filter through.

**NOTE:** Must be laid by accredited paviours, and installed using Firth’s Permeable Paving system.

This paver is available in the North Island only.

Dimensions: 300 x 300 x 50mm  
Number per m²: 11.11  
Permeability Rate: 1800mm/hr
