### FEATURES & BENEFITS:

#### Maximum Versatility and Performance

- The Compac III design results in decreased unit weight; making installation easier while maintaining structural integrity
- Allows for various positive connections with reinforcement to build engineered walls in excess of 18.2m tall
- Increases vertical drainage through face units

#### Ease of Installation

- Units do not require inverting
- Caps are solid and glued to top course (pins not required)
- Unit shape allows for radius curves and vertical core alignment
- Kidney shaped pin receiving hole allows for installer-friendly construction adjustments
- Near vertical or battered setback construction options

#### Aesthetics

- Versatile colour to complement any landscape
- Natural stone texture appearance

**PLEASE NOTE:** Colour Blends are indicative only. Viewing a sample before purchasing is highly recommended. Similar to features of real stone, Firth concrete Retaining Wall blocks will have natural variation in colour and characteristics. So when choosing Firth Retaining blocks, please expect colour hue variations and regional differences due to locally sourced raw materials. It's all part of the natural beauty of our masonry products.
