

How to Use the BLOCKA System

1

For each Washout, have 1 Blocka Plate and 2 Blocka Ties ready, along with the Blocka Cable Tensioner.

2

Always fasten the flat side of the Blocka Plate against the masonry wall. Strengthening ribs must face away from the wall.

3

Thread each Blocka Tie through the one opening of the Blocka Plate.

4

Wrap the Blocka Tie around a reinforcing rod.

5

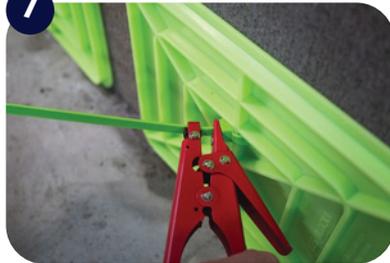

Thread the Blocka Tie back through the second opening.

6

Connect the Blocka Tie and pull it as tightly as possible.

7

Always use the Blocka Cable Tensioner. Ensure the head of the tie is centred on the vertical rib to allow for easy removal.

8

When both Blocka Ties are tight, the Blocka Plate is now firmly secured against the masonry wall, ready for block fill.

9

When the concrete has set, cut the Blocka Tie and remove the Blocka Plate for reuse.

10

Brush or wash off any residual concrete on the Blocka Plate before storing to extend the life of the Blocka Plates.

Product Specifications

- Blocka Plates: 20 per box, each plate reusable 25+ times.
- Blocka Ties: Bag of 100, usage = 2 ties per washout (20 ties per Plate = 10 uses)
- Blocka Cable Tensioner: 1 per Starter Pack

Attention

Do not secure Blocka Ties through the upper openings only. Always use 2 Blocka Ties per washout. Failure to follow the Blocka System instructions completely may lead to the Blocka Plate separating from the wall and causing a block fill leak.

BLOCKA

The Safer, More Sustainable, and Efficient Washout Solution.

BLOCKA by Grout Stoppers is a revolutionary yet simple system that eliminates all your washout boxing problems.

Lightweight & Compact

Re-Usable

Fast & Simple

Secure & Tested

Cost-Cutting

Why Contractors Choose BLOCKA:

Reduce Costs – lower material and labour expenses

Stop Waste – reusable Blocka Plates eliminate timber debris

Save Time – quick setup with Blocka Ties and no power tools

Build Smarter – improve efficiency and sustainability

No More:

- ✘ Blowouts
- ✘ Drilling, power tools, or expensive fixings
- ✘ Long lengths of timber to transport and store

The BLOCKA System Starter Pack Includes:

Blocka Plates (20 per box) – replace 8 I/mo timber boxing

Blocka Ties (bag of 100) – box up to 50 washouts

Blocka Cable Tensioner (1 per Starter Pack) – ensures secure installation

Supplied as a complete system proven to save money, time, and eliminate blowouts.
