Dricon® PaveSand™ is specially designed for filling joints between paving. It consists of a uniformly blended mixture of graded sands, to allow flexible filling of vertical joints. It forms a flexible joint allowing slight movement of the pavers.

### YIELD per 20kg bag
Paver recommended gap width 2-4mm. This table should be used as a guide only.

Dricon® PaveSand™ is specially designed for filling joints between paving. It consists of a uniformly blended mixture of graded sands, to allow flexible filling of vertical joints. It forms a flexible joint allowing slight movement of the pavers.

### COMPRESSION STRENGTH
Not applicable.

### WATER CONTENT
Not applicable.

### PAVER PREPARATION
Ensure the pavers have had an initial vibrating plate compaction of 2 passes to bed them in to the underlying bedding sand. For pedestrian and private driveways the plate compactor should have the following minimum characteristics; 60-120kg static weight and 10-24Kn centrifugal force. The pavers must also be dry.

### SPREADING
On completion of laying the pavers, PaveSand™ should be spread evenly over the surface and swept into all the joints using a stiff broom.

Sand flows more freely into the paving joints when the paving is dry.

### FILLING
Fill joints to the top of the pavers.

### COMPACTION
Compact for at least 2 passes with a plate compactor.

### RE-APPLY, RE-SWEEP, RE-COMPACT
Re-apply PaveSand™ to top up the joints, sweep and re-compact.

Repeat until PaveSand™ is sitting, compacted, just below the top of the pavers.

### INSPECTION
Dricon® recommend regular inspection of the completed paving project over the first few weeks to ensure the standard joints are maintained.
PAVESAND

DRICON® TECHNICAL DATA SHEET

DANGER

• Causes skin irritation
• May cause respiratory irritation
• Causes serious eye damage
• If medical advice is needed, have product container or packaging at hand

PREVENTION

• Only use outdoors or in a well-ventilated area
• Avoid breathing dust
• Wear protective clothing – safety goggles and a P2 dust mask must be worn
• Contaminated clothing should not be allowed out of the workplace

RESPONSE

IF ON SKIN: Wash with plenty of soap and water. Take off contaminated cloth and wash before reuse. If skin irritation or rash occurs, get medical advice/attention.

IF INHALED: Move to fresh air and keep resting in a position comfortable for breathing.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if worn and easy to do. Continue to rinse.

Immediately call the NATIONAL POISON CENTRE 0800 764 766 or doctor/physician.

GENERAL INFORMATION

If only part of the bag is required, mix the entire contents of the bag together first in a dry state, return the unwanted portion to the bag or alternatively a dry sealed container, then follow the instructions.

All mortars and concrete products may exhibit a temporary 'whitening', otherwise known as efflorescence which neither affects strength nor durability.
