2. Hazard Identification

Approval
This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO, Approval HSR002526, Cleaning Products (Corrosive) Group Standard 2017). The substance has been classified as hazardous according to the criteria in the Hazardous substances (Minimum Degrees of Hazard) Notice 2017:

<table>
<thead>
<tr>
<th>Classes</th>
<th>Hazard Statement</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.3B</td>
<td>H316 - Causes mild skin irritation.</td>
</tr>
<tr>

<td>H290 - May be corrosive to metals.</td>
</tr>
</tbody>
</table>

SYMBOLS
DANGER

Other Classifications
There are no other classifications that are known to apply.

Precautionary Statements
P101 - If medical advice is needed, have product container or label at hand.
P102 - Keep out of reach of children.
P103 - Read label before use.
P234 - Keep only in original container.
P264 - Wash hands thoroughly after handling.
P280 - Wear protective gloves/protective clothing/eye protection/face protection*.
P332+P313 - If skin irritation occurs: Get medical advice/ attention.
P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337+P313 - If eye irritation persists: Get medical advice/attention.
P390 - Absorb spillage to prevent material damage.
P406 - Store in a corrosive resistant container with a resistant inner liner.
3. Composition / Information on Ingredients

</tr>
</tbody>
</table>

This is a commercial product whose exact ratio of components may vary. Trace quantities of impurities are also likely.

4. First Aid

General Information
You should call the National Poisons Centre if you feel that you may have been harmed, burned or irritated by this product. The number is 0800 764 766 (0800 POISON) (24 hr emergency service). If medical advice is needed, have this SDS, product container or label at hand.

Recommended first aid facilities
Ready access to running water is recommended. Accessible eyewash is recommended.

Exposure
Swallowed
IF SWALLOWED: Do NOT induce vomiting. Rinse mouth. Contact a doctor if you feel unwell.

Eye contact
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Apply continuous irrigation with water for at least 15 minutes holding eyelids apart. If eye irritation persists: Get medical advice/attention.

Skin contact
IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse.

Inhaled
IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. If patient is unconscious, place in the recovery position (on the side) for transport and contact a doctor. If experiencing respiratory symptoms: Immediately call a POISON CENTER or doctor.

Advice to Doctor
Treat symptomatically.

5. Firefighting Measures

Fire and explosion hazards:
There are no specific risks for fire/explosion for this chemical. It is non flammable. Not applicable.

Suitable extinguishing substances:
Unknown.

Unsuitable extinguishing substances:
Carbon dioxide, and if combustion is incomplete, carbon monoxide and smoke. Water. May form toxic mixtures in air and may accumulate in sumps, pits and other low-lying spaces, forming potentially explosive mixtures.

Products of combustion:
Self-contained breathing apparatus. Safety boots, non-flammable overalls, gloves, hat and eye protection.

Hazchem code:
2X

6. Accidental Release Measures

Containment
If greater than 100L is stored, secondary containment is required. Emergency plans to manage any potential spills must be in place. Prevent spillage from spreading or entering soil, waterways or drains.

Emergency procedures
In the event of spillage alert the fire brigade to location and give brief description of hazard. Stop the source of the leak, if safe to do so. Shut off all possible sources of ignition. Wear protective equipment to prevent skin, eye and respiratory exposure. Clear area of any unprotected personnel. Contain using sand, earth or vermiculite. Do not use sawdust. Prevent by whatever means possible any spillage from entering drains, sewers, or water courses. (If this occurs contact your regional council immediately).

Clean-up method
Use absorbent (soil, sand or other inert material). Rags are not recommended for the
clean-up of spills, as they may create fire or environmental hazard. Collect and seal in properly labelled containers or drums for disposal. If contamination of crops, sewers or waterways has occurred advise local emergency services.

**Disposal**

Mop up and collect recoverable material into labelled containers for recycling or salvage. Recycle containers wherever possible. This material may be suitable for approved landfill. Dispose of only in accord with all regulations.

**Precautions**

Wear protective equipment to prevent skin and eye contamination and the inhalation of vapours. Work up wind or increase ventilation.

### 7. Storage & Handling

**Storage**

Avoid storage of harmful substances with food. Store out of reach of children. Containers should be kept closed to minimise contamination. Store in original containers only. Keep in a cool, dry place. Avoid contact with incompatible substances as listed in Section 10.

**Handling**

Keep exposure to a minimum, and minimise the quantities kept in work areas. See section 8 with regard to personal protective equipment requirements. Avoid skin and eye contact and inhalation of vapours, mists or aerosols.

### 8. Exposure Controls / Personal Protective Equipment

**Workplace Exposure Standards**

A workplace exposure standard (WES) has not been established by WorkSafe NZ for this product. There is a general limit of 3mg/m$^3$ for respirable particulates and 10mg/m$^3$ for inhalable particulates when limits have not otherwise been established.

<table>
<thead>
<tr>
<th>NZ Workplace Exposure Std</th>
<th>Ingredient</th>
<th>WES-TWA</th>
<th>WES-STEPL</th>
</tr>
</thead>
<tbody>
<tr>
<td>No ingredient listed</td>
<td>-</td>
<td>-</td>
<td>-</td>
</tr>
</tbody>
</table>

**Engineering Controls**

In industrial situations, it is expected that employee exposure to hazardous substances will be controlled to a level as far below the WES as practicable by applying the hierarchy of control required by the Health and Safety at Work Act (2015) and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016. Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe air borne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation.

**Personal Protective Equipment**

**Eyes**

Avoid contact with eyes. Use safety glasses and or chemical splash goggles if splashes are possible. Select eye protection in accordance with AS/NZS 1337.

**Skin**

Avoid any skin contact. Wear overalls, rubber boots and impervious acid proof gloves. PVC, nitrile, neoprene or natural rubber gloves are recommended. Protective gloves or suitably resistant material must comply with AS 2161. Replace frequently. Gloves should be checked for tears or holes before use. Protective clothing must comply with AS 2919, AS3765.1 or AS3765.2. PVC or rubber boots must comply with AS/NZS 2210.2 and selected and maintained in accordance with AS/NS2210.1. Remove protective clothing and wash exposed areas with soap and water prior to eating, drinking or smoking.

**Respiratory**

Respirator is not required under normal use. Ensure adequate natural ventilation. If product is being used in confined conditions, the use of a mask or respirator may be preferred.

**WES Additional Information**

Not applicable
9. Physical & Chemical Properties

- **Appearance**: yellow liquid
- **Odour**: none
- **pH**: <1
- **Vapour pressure**: no data
- **Viscosity**: no data
- **Boiling point**: no data
- **Volatile materials**: no data
- **Freezing / melting point**: no data
- **Solubility**: soluble in water
- **Specific gravity / density**: 1.2g/cm³
- **Flash point**: no data
- **Danger of explosion**: no data
- **Auto-ignition temperature**: no data
- **Upper & lower flammable limits**: no data
- **Corrosiveness**: corrosive to metals: steel @ 20°C: slight, Aluminium @ 20°C: slight. Note: concrete wash is designated a “Dangerous Good” according the ADG code because corrosion of aluminium exceeds 6.25mm per year at 55°C.

10. Stability & Reactivity

- **Stability**: Stable
- **Conditions to be avoided**: Containers should be kept closed in order to avoid contamination. Keep from extreme heat and open flames.
- **Incompatible groups**: Acids, strong alkalis, oxidising agents, pool chlorination products (e.g. bleach), cyanides.
- **Substance Specific Incompatibility**: none known
- **Hazardous decomposition products**: May emit toxic fumes and corrosive fumes if heated to decomposition.
- **Hazardous reactions**: No hazardous polymerisation will occur.

11. Toxicological Information

**Summary**

IF SWALLOWED: Ingestion of this product may cause gastrointestinal irritation and irritation of the mouth.

IF IN EYES: Contact with eye can cause irritation. the pH of this solution is <1. Prolonged contact may cause severe eye irritation/damage.

IF ON SKIN: prolonged contact may cause mild skin irritation. May cause stinging if it comes into contact with a cut or broken skin.

IF INHALED: mists of this mixture may cause irritation of the nose, throat and respiratory system.

CHRONIC EFFECTS: none known.

**Supporting Data**

**Acute**

**Skin**

The mixture is considered to be an eye irritant, because some of the ingredients present are considered eye irritants in more concentrated form.

**Chronic**

Sensitisation: No ingredient present at concentrations > 0.1% is considered a sensitiser.

Mutagenicity: No ingredient present at concentrations > 0.1% is considered a mutagen.

Carcinogenicity: No ingredient present at concentrations > 0.1% is considered a carcinogen.

Reproductive / Developmental: No ingredient present at concentrations > 0.1% is considered a reproductive or developmental toxicant or have any effects on or via lactation.

Systemic: No ingredient present at concentrations > 1% is considered a target organ toxicant.

Aggravation of existing conditions: None known.
12. Ecological Data

Summary
This mixture may be harmful towards aquatic organisms, as the pH is <1. Do not allow mixture to reach drains or waterways.

Supporting Data

Aquatic
No data for mixture is available. Water contaminated with this product is acidic and should not be allowed to enter the environment.

Bioaccumulation
Not applicable

Degradability
Biodegradable.

Soil
No data available for the mixture. The soil toxicity value for the mixture is estimated to be ≥ 100 mg/kg.

Terrestrial vertebrate
This product is not considered harmful to terrestrial vertebrates. No LC₅₀ (diet) data for ingredients are available and the classification is based on the LD₅₀ (oral) – see section 11 – oral toxicity.

Terrestrial invertebrate
The mixture is not considered harmful to terrestrial invertebrates.

Biocidal
Not designed as a biocide.

13. Disposal Considerations

Restrictions
There are no product-specific restrictions, however, local council and resource consent conditions may apply, including requirements of trade waste consents.

Disposal method
Disposal of this product must comply with the Hazardous Substances (Disposal) Notice 2017 and the requirements of the Resource Management Act for which approval should be sought from the Regional Authority. The substance must be treated and therefore rendered non-hazardous before discharge to the environment.

Contaminated packaging
Disposal of contaminated packaging must comply with the Hazardous Substances (Disposal) Notice 2017 clause 12. Ensure that the package is rendered incapable of containing any substance and is disposed in a manner that is consistent with the requirements of the substance it contained and the material of the package. If possible reuse or recycle packaging.

14. Transport Information

There are no specific restrictions for this product (not a dangerous good).

UN number: 1760
Proper shipping name: CORROSIVE LIQUID, N.O.S.
Class(es) 8
Packing group: III
Precautions: CORROSIVE LIQUID
Hazchem code: 2X

NOTE: concrete wash is designated a “Dangerous Good” according the ADG code because corrosion of aluminium exceeds 6.25mm per year at 55°C. Not corrosive to skin.

15. Regulatory Information

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO). Approval code: HSR002526: Cleaning Products (Corrosive) Group Standard 2017.

Specific Controls

Key workplace requirements are:
SDS
To be available within 10 minutes in workplaces storing any quantity.
Inventory
An inventory of all hazardous substances must be prepared and maintained.
Packaging
All hazardous substances should be appropriately packaged including substances that have been decanted, transferred or manufactured for own use or have been supplied.
Labelling
Must comply with the Hazardous Substances (Labelling) Notice 2017.
Emergency plan
Required if > 100L is stored.
Certified handler
Not required.
Tracking
Not required.
Bunding and secondary containment
Required if > 100L is stored.
Signage
Required if > 1000L is stored.
Location compliance certificate
Not required.
Flammable zone
Not required.
Fire extinguisher
Not required.

Note: The above workplace requirements apply if only this particular substance is present. The complete set of controls for a location will depend on the classification and total quantities of other substances present in that location.
Other Legislation
In New Zealand, the use of this product may come under the Resource Management Act and Regulations, the Health and Safety at Work Act 2015 and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016, local Council Rules and Regional Council Plans.

Review

Date: June 2018

Reason for Review: NA – new SDS

Disclaimer

This SDS was prepared by Datachem LTD and is based on our current state of knowledge, including information obtained from suppliers. The SDS is given in good faith and constitutes a guideline (not a guarantee of safety). The level of risk each substance poses is relevant to its properties (as summarised in the SDS) AND HOW THE SUBSTANCE IS USED. While guidelines are given for personal protective equipment, such precautions must be relevant to the use. The likely HSNO classifications, are based on information from the suppliers, our experience, EPA Guidelines and international classifications. The full formulation details were not available to Datachem LTD. This SDS is copyright Datachem and must not be copied, edited or used for other than intended purpose. To contact the SDS author, email info@datachem.co.nz or phone: (09) 940 30 80.
